

ISO 27018 - Introduction Training - Information security- protection of personally identifiable information in public clouds (E- Learning)

This course provides a foundational understanding of the international standard for implementing measures to protect Personally Identifiable Information (PII) using the controls outlined in ISO 27018:2019. Through this course, you will gain a solid grasp of the standard's fundamentals, including the extended, additional, and privacy-specific controls applicable to the protection of PII for public cloud service providers. It serves as an excellent starting point for exploring other courses within the information security management family of standards.

FOR WHOM?

This course is aimed at:

- Anyone who wishes to understand and introduce the ISO 27018:2019 into their organisation, as an extension to scope of existing ISO 27001 certification.
- Anyone working within an organisation which is a public cloud computing service provider acting as a PII provider.
- Anyone interested in upskilling their knowledge of the ISO 27001 family of standards.

COURSE CONTENT

- How to understand the content, structure, and application of ISO 27018:2019.
- How ISO 27018:2019 relates to the information security management family of standards, such as ISO 27001, ISO 27017, and ISO 27701.
- How to understand the importance and applicability of the relevant controls of ISO 27018 to your organisation, with particular focus on additional controls, extended, and privacy controls .

OBJECTIVES

The e-learning course is structured in alignment with ISO 27018:2019 and focuses on four key areas of study:

- **Overview:** This section covers the history of the standard, its relationship to other standards (such as ISO 27001:2022 and ISO 27017), a glossary of key terms, and the benefits of ISO 27018:2019 certification for your organization.
- **Extended Controls:** This section explores the extended controls within the standard, providing detailed context on the requirements and associated guidance.
- **Additional Controls:** Building on the extended controls, this section delves into the information security controls found in Annex A of ISO 27018:2019. It provides insights into each control, along with specific guidance for implementing public cloud PII protection for every individual control.
- **Privacy Controls:** Lastly, this section addresses the specific privacy controls in the standard, offering comprehensive information on each control and its implementation.

PRACTICAL INFORMATION

We recommend taking up to half a day to complete the NQA E-Learning courses, but users may take more or less time depending upon their own needs and learning styles.
