POUR QUI ?

This course is aimed at:

- Anyone who wishes to understand and introduce the ISO 27018:2019 into their organisation, as an extension to scope of existing ISO 27001 certification.
- Anyone working within an organisation which is a public cloud computing service provider acting as a PII provider.
- Anyone interested in upskilling their knowledge of the ISO 27001 family of standards.

CONTENU DE LA FORMATION

- How to understand the content, structure, and application of ISO 27018:2019.
- How ISO 27018:2019 relates to the information security management family of standards, such as ISO 27001, ISO 27017, and ISO 27701.
- How to understand the importance and applicability of the relevant controls of ISO 27018 to your organisation, with particular focus on additional controls, extended, and privacy controls .

OBJECTIFS

The e-learning course is structured in alignment with ISO 27018:2019 and focuses on four key areas of study:

- **Overview:** This section covers the history of the standard, its relationship to other standards (such as ISO 27001:2022 and ISO 27017), a glossary of key terms, and the benefits of ISO 27018:2019 certification for your organization.
- **Extended Controls:** This section explores the extended controls within the standard, providing detailed context on the requirements and associated guidance.
- **Additional Controls:** Building on the extended controls, this section delves into the information security controls found in Annex A of ISO 27018:2019. It provides insights into each control, along with specific guidance for implementing public cloud PII protection for every individual control.
- **Privacy Controls:** Lastly, this section addresses the specific privacy controls in the standard, offering comprehensive information on each control and its implementation.
